

Wallet::AddressBook

```
classDiagram
    class WalletAddressBookImpl["Wallet::AddressBookImpl"]
    class WalletAddressBook["Wallet::AddressBook"]
    WalletAddressBookImpl --|> WalletAddressBook
```

The diagram illustrates a class hierarchy. At the bottom is a gray-shaded box labeled 'Wallet::AddressBookImpl'. A blue arrow points vertically upwards from this box to a white box labeled 'Wallet::AddressBook' at the top. This represents that 'Wallet::AddressBookImpl' inherits from or implements 'Wallet::AddressBook'.

Wallet::AddressBookImpl
