

wallet::rpc::RequestHandler

```
classDiagram
    class RequestHandler["wallet::rpc::RequestHandler"]
    class OmqServer["wallet::rpc::OmqServer"]
    OmqServer ..|> RequestHandler : request_handler
```

The diagram illustrates a class hierarchy where `wallet::rpc::OmqServer` inherits from `wallet::rpc::RequestHandler`. The inheritance is represented by a dashed purple arrow pointing from the `OmqServer` box to the `RequestHandler` box, with the label `request_handler` placed to the right of the arrow.
